5.- Acknowledgement and Assumption of Risks

YOU SHOULD READ THIS SECTION CAREFULLY; HOWEVER, IT DOES NOT EXPLAIN ALL OF THE RISKS THAT MAY ARISE, OR HOW SUCH RISKS RELATE TO YOUR CIRCUMSTANCES.

IT IS IMPORTANT THAT YOU FULLY UNDERSTAND THE RISKS INVOLVED BEFORE MAKING A DECISION TO PARTICIPATE IN THE TOKEN SALE.

5.1. Regulatory risk

You are aware that new or changing laws and regulations or interpretations of existing laws and regulations in various jurisdictions may materially and adversely affect the value and/or functionality of the Tokens or other parameters related thereto (e.g., liquidity, marketplaces, rights, transferability). Such regulatory developments could adversely affect the Tokens, in particular by determining that they are regulated financial instruments requiring registration and that their use is unlawful or subject to conditions that make it commercially undesirable to continue to operate the Camino Network.

The industry is new and may be subject to increased oversight and scrutiny, including investigations or enforcement actions. There can be no assurance that governmental authorities will not investigate and/or take enforcement action against the Camino Network Foundation. Such governmental activities may or may not specifically target the Camino Network Foundation. Any of the foregoing could subject the Camino Network Foundation to judgments, settlements, fines or penalties, or cause the Camino Network Foundation to restructure its operations and activities or cease offering certain products or services, all of which could harm its reputation or result in higher operating costs, which in turn could have a material adverse effect on the Tokens.

The tax characterization of the Tokens is uncertain. You must obtain tax advice in connection with the Tokens, which may result in adverse tax consequences to you, including withholding taxes, income taxes and tax reporting requirements.

5.2. Blockchain ecosystem risk

The growth of the blockchain industry is subject to a high degree of uncertainty. Factors affecting the further development of the cryptocurrency industry and blockchain networks include, but are not limited to:

- a. Global growth in the adoption and use of tokens and other blockchain technologies;
- b. Governmental and quasi-governmental regulation of tokens and their use, or restrictions or regulation of access to and operation of blockchain networks or similar systems;
- c. The maintenance and development of the open-source software protocol of blockchains;
- d. Changes in consumer demographics and public tastes and preferences;
- e. The availability and popularity of other forms or methods of buying and selling goods and services or trading assets, including new means of using fiat currencies or existing networks;
- f. General economic conditions and the regulatory environment relating to tokens;
- g. A decline in the popularity or acceptance of tokens would adversely affect our results of operations;
- h. A hack of the blockchain or a smart contract;
- i. Phishing websites could harm the reputation of blockchain projects;
- j. The slowing or stopping of the development, general acceptance, adoption and use of blockchain networks and tokens may deter or delay the acceptance and adoption of the Camino Network and the Tokens;
- k. Prices of blockchain assets are extremely volatile. Fluctuations in the price of the Tokens could materially and adversely affect the Camino Network, and the Tokens may also be subject to significant price volatility; and
- l. The price of the Tokens has historically been subject to dramatic fluctuations and is highly volatile, and the market price of the Tokens may also be highly volatile.

5.3. Blockchain technology risk

Blockchain itself

Because the Tokens are based on a Blockchain, any malfunction, failure or abandonment of such protocol could have a material adverse effect on the Tokens.

Advances in cryptography or technological advances, such as the development of quantum computing, could pose risks to the Tokens by rendering ineffective the cryptographic consensus mechanism that underpins the Blockchain.

Any blockchain is prone to periodic congestion during which transactions may be delayed or lost.

Source Code

The source code underlying the Blockchain and the Tokens may contain errors, bugs, defects or inconsistencies that could affect the predictability, usability, functionality, stability and security of thereof.

The Camino Network Foundation will attempt to perform quality assurance and audit procedures to ensure that the source code accurately reflects the intended functionality, but there can be no guarantee that all errors will be detected or that the source code will be error-free.

In addition, source code modifications or upgrades may result in unexpected or unintended consequences that may adversely affect the Blockchain or the Tokens. Source code modifications that constitute updates may be required in connection with the development of the Tokens, and your failure to participate in such updates may result in the loss of functionality of the Tokens.

Hacking and security vulnerability

The Tokens may be subject to expropriation and/or theft. Hackers or other malicious groups or organizations may attempt to interfere with the Tokens in a variety of ways, including, but not limited to, malware attacks, denial of service attacks, consensus-based attacks, sybil attacks and spoofing. In addition, there is a risk that the Tokens may contain intentional or unintentional bugs or vulnerabilities that could adversely affect the Tokens or result in the loss of your Tokens or your ability to access or control your Tokens. In the event of any such software bug or vulnerability, there may be no remedy and holders of Tokens are not guaranteed any remedy, refund or compensation.

Uninsured Losses

Unlike bank accounts or accounts with some other financial institutions, the Tokens are uninsured unless you specifically purchase private insurance to cover them. Therefore, in the event of loss or diminution of their functionality or value, there is no public insurer or private insurance arranged by us to provide recourse to you.

IN ADDITION TO THE RISKS DESCRIBED ABOVE, THERE ARE OTHER RISKS ASSOCIATED WITH YOUR PURCHASE, POSSESSION AND USE OF THE TOKENS, INCLUDING RISKS THAT THE CAMINO NETWORK FOUNDATION CANNOT ANTICIPATE. THESE RISKS MAY ALSO MANIFEST THEMSELVES AS UNANTICIPATED VARIATIONS OR COMBINATIONS OF THE RISKS DISCUSSED IN THESE TERMS AND CONDITIONS.
